

Can-C Eye Drops Safely Reverse Cataracts in Dogs!

WISECHOICE MEDICINE, Jun, 8, 2018

Dogs with both immature and ripe cataract responded quickly to the daily applications of soothing Can-C eye drops.

Can-C Clinical Study Proves Cataract Reversal in Dogs:

- Improved visual behavior of the animals within weeks of treatment.
- Cataract reversal starts from the periphery of the cataract followed by increased transparency of the lens.
- 96% of canine eyes treated with N-acetyl-carnosine (Can-C) showed notable improvements.
- Dogs with both immature and ripe cataracts showed significant visual improvement.
