

This Cheap Drone Is The Most Amazing Invention In 2018, Going Viral In The United States Now...

Gadgets guide, 10/22/18

"Portable, ease of use - taking the flyest selfies ever..."

This selfie trend is going viral worldwide...

Try to picture having a **mini drone inside your pocket** and use it for a million ways you could ever imagine, whenever and wherever you want to. Well, this idea is really happening.

First, there was the standard selfie, then the selfie stick, and now the next evolution of the selfie has arrived!

Nobody knows who did it first, but soon thousands of people in the United States started uploading **incredible selfies from insane angles**.

They uploaded them to social media and soon EVERYONE wanted to do the same!

Unlike those big (and expensive!) ones that we had before, this one is **the same size as a smartphone, and much easier to use**. This might be the first drone that was made for the entire population.

What are we talking about?

It's about the breakthrough **DroneX Pro**, a brand new type of drone made so that anyone can fly it. It's **perfect for making the ultimate selfies!**

It was designed by 2 genius engineers, who love drones. They found that the drones they had were very bulky, heavy and difficult to travel with, which is why they designed this **ultra compact drone**, without sacrificing the main features of the drones.

It's firm, it's easy to use, and it can Livestream and record video clips on your phone!

People are using them to take 'the ultimate selfies' - the results are incredible...

How does it work?

Yes! We were surprised how easy it was to set it up. First, you will need to install an app (just scan the QR code from the manual), as simple as that.

Once you've done that, just plug in the battery, start the app, and connect your drone. In less than 10 seconds, you will be ready to go!

And the best part is, the flying is very easy. The controls are just superb, very intuitive. Flying this drone just feels natural. Some younger colleagues were in the office at that moment and they rolled with it within a few seconds. Their first drone flight ever. It is just amazing how easy and fluid controls are!

Once you're in the air, it's time to use the built-in camera. You can take the most amazing photos and videos. Create videos from almost impossible angles and impress your friends with the coolest selfies!

See DroneX PRO in action:

That's what we all want to know, right? I guessed it would be like \$300 to \$400, but I was wrong. They sell it for \$99(limited time offer), which is tremendously cheap for a drone of this quality!

How to buy a DroneX Pro

That's super easy. You can buy it from [the official website](#).

This drone is perfect because...

Altitude hold
Stable flight and steady landing

WiFi FPV
Easy smartphone controls

Video / Selfie
Take amazing footage

6-Axis Gyro
Self-stabilization technology

3D Flips and Rolls
Agile movement and precise positioning

Headless mode
Breakthrough remote control technology

What makes this drone so special?

The main benefits of the **DroneX Pro** are its **portability, ease of use, HD camera and price**.

This drone is hardly bigger than a smartphone. Combined with its foldable rotors, you got **the world's most portable drone**. It will fit into every pocket or a backpack!

Absolutely everyone can fly with this drone! Its controls were designed to the perfection. It also has incredible hovering capabilities. You do not have to focus on height, just steer and enjoy your flight!

A drone named like this obviously comes with a high quality camera. The DroneX Pro is just perfect for taking amazing pictures and videos.

When **flying is so easy**, you can fully concentrate on taking stunning shots. Film nature, friends and even yourself in amazing quality!

And so far we have not even mentioned that the drone is made of ABS plastic, which makes the drone much lighter and stronger.

Last but not least, the price is quite low. Less than \$100 for a drone of this quality. This has to be the best price-quality drone there!

Conclusion: Is it worth it?

This high-quality drone for this low price obviously means yes! Just think of all the amazing pictures and videos you can capture with the **DroneX Pro**. Even just the fun of flying a drone already makes this worth it!

PS: Do not miss the offer while it still stands!

How To Get A DroneX Pro?

Now that you are aware of this amazing new drone, and if it's still in stock, here is how to get one:

- 1) Order the DroneX Pro from [the official website](#).
- 2) Download the Drone app(Android & iOS) and connect to the drone.
- 3) Start taking amazing selfies!

It's As Simple As That!
